Muhammad Usman

Software Engineering Student

OBJECTIVE

Motivated Software Engineering student at NUML Lahore with hands-on experience building C++, Python, and Java desktop applications. Skilled in OOP, file handling, and problem-solving, with a proven ability to teach and communicate technical concepts clearly. Seeking an opportunity to apply and grow these skills in a professional software development role.

WORK EXPERIENCE

Teacher,

2025 - Present

Dar-ul-Hamd Academy, Lahore

- Teach students from Classes 5-8 across assigned subjects.
- Prepare and deliver lessons according to students' learning levels.
- Explain concepts clearly and support students with academic difficulties.
- Conduct class activities, homework and assessments to monitor progress.
- Maintain a positive and disciplined classroom environment.

Cashier,

Jan 2024 - Feb 2025

Lahore

- Responsible for handling cash, managing transactions, and providing excellent customer service with accuracy and efficiency.

PROJECTS

Coffee Shop Management System (C++)

- Built a command-line system simulating real-world coffee shop operations.
- Implemented order management, billing, inventory/stock control, employee management and admin controls.
- Used file handling for persistent storage and applied OOP concepts (structs), arrays and menu-driven programming.

ATM Management System (Python)

- Developed a command-line ATM system with Admin and Customer roles.
- Implemented deposit, withdrawal, transfer, balance check, PIN change, transaction receipts and login attempt limits.
- Applied OOP, file handling, exception handling, input validation and basic authentication concepts.

Note Taking Application (Java)

- Created a Java Swing desktop app to manage notes locally.
- Implemented create, view, delete, save and load notes using text file storage.
- Applied OOP, encapsulation, ArrayList, GUI components, event handling and file I/O with basic validation and error handling.
